

**ABSTRACT OF THE DISCLOSURE**

An intake apparatus for an internal combustion engine includes an intake port leading to an engine cylinder. The intake port is divided into first and second passage section by  
5 a partition extending in the intake port in a longitudinal direction of the intake port. A gas motion control valve is arranged to open and close an upstream end of the second passage section. A connection passage connects an upstream  
10 end portion of the second passage section to the first passage section.
